

How to Install the NAP Lockdown Browser

Installing the NAP lockdown browser on an iPad

Before following this step-by-step guide it is essential that any prior NAP lockdown browser is uninstalled.

Uninstall NAP 2023 or earlier versions

<p>1. <i>Touch and hold</i> on the NAP app icon</p>	
<p>2. The app icon should expand slightly to show the following pop-out window 3. Choose Delete App</p>	

Installing latest NAP app

1. Ensure the iPad is FULLY set up with Intune and has Company Portal installed
2. Sign into Company Portal
3. Click on Other Apps
(about halfway down, on the left)
4. Find the NAP app
5. Press Install
6. When the pop-out window appears click either *Manage* or *Install*
(This varies from iPad to iPad)
7. Once it states it is *Downloading*, it should begin appearing on the iPad's screen.

IMPORTANT: if you have chosen to use *Screentime* to manage your child's iPad, make sure ALL apps available within Company Portal are accessible during school hours.
